

Exhibit 3

Supplemental Exhibit E – Name, Citation, and Circumstances for Exhibit A References¹

Abbreviated Name	Full Name
SuperPages	<p>GTE, a predecessor in interest to Idearc, invented and developed the SuperPages System as reflected in the documents produced by Idearc, David Fay, and Deverix Horn. Early in 1991, GTE began researching and developing ways to make Yellow Page information available through various electronic media, including over a network. By October 1992, GTE had developed several prototypes of different ways to make the Yellow Page information available through at least six types of electronic media, including a Personal Computer ("PC") that could be connected to a remote database. GTE continued researching and developing these electronic media resulting in the development of Internet based prototypes in 1994 and 1995. By January 1996, GTE launched the SuperPages.com website that was supported by the SuperPages System. GTE continued researching and developing additional features for the SuperPages System. David Fay, a former GTE employee, was involved in the early research and development of the SuperPages System.</p> <p>GTE also began developing a business case for placing the Yellow Pages information into electronic media in 1993 and approved the commercialization of the SuperPages System in July 1995. Deverix Horn, a former GTE employee, was involved in analyzing and developing the business case for the SuperPages System.</p>

NYNEX System	<p>NYNEX, a predecessor in interest to Idearc, invented and developed the NYNEX System, as referenced in the documents produced by Idearc, David Fay, Deverix Horn, and Mike Snow. In 1992 NYNEX developed and launched an electronic yellow pages directory called NYNEX Northeast Access. The NYNEX Northeast Access system was available through a dial-up connection. NYNEX continued researching and developing electronic Yellow Page information, and in January 1995 launched a version of the NYNEX Interactive Yellow Pages on Prodigy. In October 1995, NYNEX launched a nationwide version of the NYNEX Interactive Yellow Pages on the Internet and offered national listings. Development continued and in January 1996, Big Yellow, yet another evolution of the NYNEX system was launched.</p>
